

Custom Amplifier

by fibercryst

The ultimate laser amplifier for your needs

Unlock the full potential of your laser system by benefiting from the cutting-edge Single Crystal Fiber (SCF) amplification technology, providing enhanced amplification efficiency and superior beam quality. Fibercryst, developed a laser amplifier platform that combines flexibility, industrial-grade performance and compact design.

Characteristics:

- CW, ns, ps and fs regimes
- Yb:YAG or Nd YAG
- Robust Mechanical mounts
- State of the art industrial electronics
- Input hollow-core fiber
- Divided Pulse Amplification on request
- Harmonic module on demand
